Experience

Contour Software (TUNE)

Senior Software Developer (Sept 2022– Present)

- Implemented the TUNE Network Initiative, enabling TUNE partners to collaborate with other network partners, fostering synergies and expanding opportunities for collaboration within the TUNE ecosystem.
- Strengthened proficiency in Typescript and Node.js through hands-on development experience.
- Acquired valuable expertise in AWS DevOps, contributing to the deployment and management of cloud-based services for remote teams.
- Actively engage in remote Git repositories, reviewing colleagues' code and providing insightful feedback to uphold code quality and collaboration.

Techstirr

Node.js Developer (Jan 2022 - Sep 2022)

- **Snap Offer:** Led the development of Snap Offer, a marketplace for restaurant offers, implementing subscription-based packages for owners and limiting daily offer postings.
- **Bar Code:** Contributed to the development of Bar Code, a marketplace for bars, enabling users to book tables for events and access offers and discounts.
- **How Much:** Played a role in How Much, a C2C marketplace facilitating product auctions, chat, and audio/video calls between users.
- Successfully developed APIs for React Native mobile apps and gained hands-on experience with React Native and Flutter development.

Learning Cert

Manager Technologies (April 2021– Dec 2021)

- Oversaw the management and strategic development of the company's technology infrastructure, focusing on our primary e-learning platform.
- Led the team through the maintenance and enhancement of our WordPress-based website, ensuring high performance and user satisfaction.
- Coordinated between different team roles to ensure seamless integration of various functionalities and modules into the e-learning products.

Cubix, Inc

Software Engineer (Mar 2017 – April 2021)

- **Lead Management System Integration with HubSpot:**
Developed and integrated a Lead Management System with HubSpot, enhancing lead tracking and management capabilities.
- **Bridge Setup for Marketing Automation:**
Implemented a bridge between company websites, Mautic, and HubSpot to automate marketing and promotional emails based on user behavior.
- **CRM Development for Design Unit:**
Designed and developed a tailored CRM solution for the design unit, facilitating seamless management of leads, clients, and projects.
- **In-House HRMS Development:**
Led the development of an advanced HRMS solution with comprehensive features covering employee engagement, time tracking, leave management, payroll management, social platform integration, and a robust job portal.
- **Marketplace Development:**
Developed a marketplace platform for listing companies and receiving reviews on their services, featuring advanced ranking algorithms and subscription models.
- **WordPress Plugin Development:**
Created a WordPress plugin for online customization of wristbands, as well as customized various WordPress themes and plugins for different websites.

Arthur Lawrence

Full Stack Developer (Jan 2017 – Mar 2017)

- Utilized my expertise in front-end and back-end technologies to contribute to the full lifecycle of web application development.
- Designed and implemented responsive and user-friendly interfaces using HTML, CSS, and JavaScript frameworks such as React and Angular.
- Contributed to the development of an in-house product, collaborating with team members to deliver innovative solutions and enhance product features.

KSA World

Development Team Lead (April 2014 - Sept 2014)

- Led and mentored a small team of UI Designers and Developers to deliver high-quality solutions.
- Coordinated closely with the sales team to understand client requirements and devise profitable solutions for their businesses.
- Utilized online portals like Upwork and Elance to identify and secure projects aligned with KSA's expertise and objectives.
- Managed project pipelines and resources effectively to ensure timely delivery and client satisfaction.
- Acted as a liaison between the technical team and other departments to facilitate seamless communication and collaboration.
- Implemented strategies to optimize project acquisition processes and enhance the company's online presence.

IRA Citi

Front End Developer (July 2013 - April 2014)

- Successfully developed and deployed several custom WordPress themes and client websites, contributing to the expansion of IRAciti's portfolio and client base.
- Designed and implemented an intuitive admin CRM system for content writing and design industries, improving workflow efficiency and client satisfaction.
- Played a key role in the adoption and implementation of new technologies, including Bootstrap, jQuery, and WordPress theme development, to enhance the capabilities of our web solutions.

Networks360

Jr Web Developer (Sept 2012 - June 2013)

As a Junior Web Developer at Networks360, I contributed to the success of ongoing projects by leveraging my JavaScript, PHP, MySQL, WordPress, and PhpMyAdmin. Working closely with senior developers, I provided assistance, ensuring the timely delivery of high-quality solutions.
